## WILSON WILL DEFINE POLICY TOWARD MEXICO IN FEW DAYS

Statement May Be in Form of Message to Congress; Powers Will Support

WASHINGTON, Nov. 12.—Secretary Bryan announced today that a statement would be issued within a few days setting forth the policy of the United States toward Mexico. Whether or not the statement will be in the form of a communication to congress by President Wilson has not been disclosed, but some of the diplomats here believe that course will be followed. The statement has been under consideration for several days. Secretary Bryan, in his conference with members of the diplomatic corps, has made it plain that the statement would define clearly the attitude of the United States.

The pronouncement, it is thought, not only will reiterate the views that the United States can never recognize a government established by arbitrary force, but will give its reasons for refusing to recognize any acts of the new congress, either as to the validity of loans or concessions, and point out the steps necessary to a solution of the problem.

It was apparent that developments in various foreign capitals brought encouragement today to administration officials. There was a feeling among them that the desire of the United States to prevent interference by the powers virtually has been accomplished.

Premier Aquino's speech explaining that Great Britain wished to do nothing that was unfriendly to the United States, semi-official assertions from Berlin that no financial assistance would be given Huerta by Germany, definite understanding with France that nothing would be done by France to embarrass the process, which the United States has selected to solve the Mexican problem, assurances from the Spanish ambassador that the sending of the armored cruiser to Mexico was purely for no political purpose, but merely to extend protection to Japanese subjects if necessary—all tended to strengthen the belief here that the Washington government finally had secured the moral support of the other world powers in its efforts to unravel the Mexican tangle. It also felt that from no part of Europe would Huerta receive financial assistance.

Mexico City Will Be Quiet.  
The fact reflected in one of the day's telegrams from abroad that the overthrow of Huerta might produce a state of anarchy in Mexico City, unless a strong substitute were provided immediately agreed with the point of view of many senators who have been discussing that phase of the situation with President Wilson. The Washington administration has taken cognizance of the eventuality, and if Huerta retreats, a accordance with the program defined here, it is said there need be little fear of any physical disturbances in Mexico City.

In the plan of the United States to force Huerta every opportunity to be peacefully there is a desire for a definite understanding also as to who is succeeding provisional president could be. The United States recognizes that the provisional successor (Continued on Page Three)

Two Reasons for Demand.  
The prevention of the convening of congress has been one essential point in the negotiations conducted by Mr. Lind. There were two reasons for this. First, it was thought that the new congress would lose no time in passing measures having to do with the oil concessions; and second, because a convening of congress would give an air of legality to Huerta's government.

Not since the recent revolution began has the feeling in the Mexican capital been so tense as it was today. The most categorical denials by the American charge, Nelson O'Shaughnessy, and President Wilson's personal representative, John Lind, of knowledge of any developments on which this feeling could be based failed to disabuse the minds of the people generally of the belief that the next 24 hours would see some decisive move on the part of Washington.

The report spread until there was scarcely a foreign resident in the capital who had not heard that the American charge had been given, was about to be given his passport. A large part of the population confidently expected to see the whole embassy staff depart on the evening train for Vera Cruz.

NOGALES, Sonora, Nov. 12.—Crossing a narrow little street from the United States into Mexico today, William Bayard Hale, personal representative of President Wilson, met the constitutional chief, General Esteban Carranza, and his cabinet. What that proposal was the American diplomat agent declined to say. He Mexican revolutionary leaders all were silent, but to those who have been anxiously awaiting the development of the American policy with regard to Mexico, it was fraught with possibilities for the destinies of the northern republic and her relations with her northern neighbor.

All that could be learned regarding the proposal was that it was in writing and that it required certain things, including pledges, from the United States, in case the United States lifted its embargo on the exportation of arms.

Among the guarantees demanded are said to be restoration of general order in a reasonable time, safety to Mexicans and other foreigners and a ultimate establishment of a bona fide representative government.

Into a little room of the tiny adobe custom house, in which General Carranza has established his "ad interim" capital, the American embassy is ushered to meet the chiefs of the revolution. General Carranza, d'his cabinet were there, and with them Mr. Hale conferred, exchanged views and impressions and waited from noon until the shadows of a long and enveloped the ruins of Nogales, U. S. A., and Nogales, Republics of Mexico.

Both towns unanimously agreed that a conference and the most pertinent (Continued on Page Two)

## PROHIBITION SOON MAY BE NATIONAL

Congress Will Prohibit Traffic in Liquors in Near Future, Hodges

COLUMBUS, O., Nov. 12.—Predicting that a resolution prohibiting the traffic in intoxicating beverages in the United States and all territories under its jurisdiction would be adopted by congress, and declaring that "if I am governor of Kansas, I will immediately convene the legislature in special session, if necessary, for the purpose of ratifying the amendment," Governor George H. Hodges of Kansas tonight threw the fifteenth biennial convention of the American Antisaloon league into an uproar of applause.

Governor L. B. Hanna of North Dakota gave statistics to show the prosperity of his state under the "prohibition" reign, and said the "brewers' year book" showed no consumption in his state of their manufacture in 1911. Governor Hanna said, however, that some intemperance was used in North Dakota, but that the consumption was so small that there was practically no profit for distillers or brewers.

Patterson Makes Stirring Talk.  
The day session was brought to a climax with a stirring address by former Governor M. R. Patterson of Tennessee, in which he gave reasons for his enlisting with the antisaloon movement and reviewed his former life and activities, which, according to his statement, had been with the forces opposed to suppression of the liquor traffic.

The council of 100, which will formulate the demands upon congress for submission of the federal amendment to the constitution providing for nationwide prohibition will meet Friday. "In some states, the throne of political power is in the saloon," said Governor Hodges, in his address tonight. "Kansas people, he said, believe that the morality that guides us individually must guide us as a state and nation."

"Prohibition was demonstrated," he continued, "that the most exhaustive revenue any state can collect is the saloon license."

With reference to federal aid in the antisaloon movement, equal suffrage, Governor Hodges said: "The quickest road to effective prohibition is through congress. The time is opportune for federal prohibition and nationwide equal suffrage." He said he could give assurance that all Kansas could give would use their efforts for "total prohibition and universal suffrage."

Good Roads Association to Go After Federal Aid  
ST. LOUIS, Nov. 12.—The United States Good Roads association today appointed a committee, headed by Gov. Elliott W. Major of Missouri, to confer with committees of both houses of congress in an effort to agree upon a measure that ultimately will result in the construction of a comprehensive system of national highways at the expense of the federal government.

The others on this committee are E. J. Watson, commissioner of the South Carolina department of agriculture; Senator J. H. Bankhead, president of the United States Good Roads association; and Jesse Taylor, editor of Better Roads, Jamestown, O.

Tulsa, Okla., was chosen for the 1914 convention.

Bitten by Dog While on Car; Gets \$3,500 Damages  
ST. LOUIS, Nov. 12.—A jury in the circuit court here today awarded Albert J. Good \$3,500 damages against the United Railways, the local traction company, because he was bitten by a dog while he was riding on a street car.

Streets of this city come from owners of automobiles. He said that the council desires to have the streets in good condition but the lack of money has been a handicap. He said that the repeal of the automobile tax ordinance would take away more than \$6,000 from the city's revenues seriously handicapping the government financially.

Mr. Curtis argued that the present tax is an unfair discrimination against one class of citizens. He said that many taxpayers who do not own automobiles favor the repeal of the ordinance. Mr. Curtis brought out that tourists find the many restrictions on the automobile here very bothersome and said that some even stay away from the city during summer months as a result. He branded the tax ordinance as entirely unjust.

Mr. Blake told of several instances in which well-to-do tourists objected sternly to complying with the many local restrictions on automobiles. Mr. Chapman said that from the remarks he has heard in his office, the average motorist was pleased with the ordinance. The matter was postponed for decision until future meetings of the council.

## EXPERTS SHOULD CONTROL CITIES

ADMINISTRATION NOT FOR POLITICIANS

Home Rule Is Most Effective, Says Secretary of Municipal League

TORONTO, Can., Nov. 12.—A report in recent municipal advances said Elton Rogers Woodruff of Philadelphia tonight in his annual review before the National Municipal league, is the realization that municipal administration is a business for permanent experts and not for politicians placed in temporary control of cities by the fortunes of the ballot. Mr. Woodruff is secretary of the league, which began here to night its nineteenth annual meeting.

Regarding public control of public utilities, Mr. Woodruff said: "The question is not shall there be public control or none, but as to the form of that control. It is now generally conceded that public utilities, and other among these are municipal utilities, must be carefully supervised and controlled so that the rights of the communities and of the users may be adequately protected. That is municipal service."

Mr. Woodruff spoke of recent experiments in selling municipal bonds "over the counter" as evidence of increased interest by citizens of municipal management.

The commission form of city government, he continued, although first tried only 13 years ago, has lost its novelty as an experiment, and the idea has gained in popularity with remarkable rapidity.

Home Rule Makes Great Gains.  
Municipal home rule has been making great gains within the last few years. Nonpartisan, the direct election of federal senators and municipal home rule all present municipal advance of the most effective kind in that place municipalities are clearly on their own legs.

"The broad and better highway has been at one and the same time the greatest bulwark of the modern municipal organization and the greatest obstacle in the way of introduction of modern efficiency methods."

The speaker advocated the extension of control to education, for city government. "We are training for today for all services," he said, "but that of the public."

Another municipal advantage he pointed out was the changing ideas of social service. Until recently this has been confined in popular estimate to what is known as charity. In the same way civic work was practically confined to the effort to drive the rascals out of office.

There is natural rejoicing, Mr. Woodruff said in this connection, "at the overwhelming victory of the fusion forces in New York and the reelection of Mayor Baker in Cleveland; and there is some depression over the results in Philadelphia and Cincinnati, but these must all be regarded as incidents in a great campaign."

The importance of the suit lies in the fact that it is the first of a series that threaten in the long run to threaten to the Western Sugar and Land company as well as the Loma Land company.

Matters of vital importance will be taken up by the 31 Paso County Progressive club at its regular monthly meeting in the headquarters at the Chamber building (third floor) at 8 o'clock this evening, and all who have enrolled as members of the club are urged to be present.

All other men or women who believe in Progressive principles, and particularly those who are willing to help in whatever degree they are able in the work planned, are urged to attend and enroll as members of the club. There are no fixed dues, and a declaration of belief in the principles of the party as expressed in the platform of 1912 is the only requisite for membership.

At this evening's meeting a membership campaign details of which have been to a considerable extent worked out will be put under way as a preliminary to active educational and organizational work to be carried on this about the county from now until next fall, such as is in progress in other counties of the state and many other states in the nation.

## WILSON SCORES THE CALUMET COMPANIES

Labor Secretary Says He Will Make Public Conditions in Strike Zone

SEATTLE, Wash., Nov. 12.—The American Federation of Labor, devoted the whole day to listening to addresses, the most notable of which was that of Secretary of Labor William B. Wilson, defining the policy of labor and warning corporations of the new conception of progress of the progress of trades union movements in Great Britain and social legislation obtained by the cooperation of the unions and the labor party. Wilson said that England was paying too much attention to its navy and too little heed to the welfare of its men and women.

Mrs. Raymond Robinson of Chicago, explaining the purpose of the National Women's Trade Union league, of which she is president, brought a wave of applause by mentioning Mrs. Penk-hurst.

The Rev. Sidney Strong of Seattle, delegate to the Federated Council of the churches of Christ, who said he represented 15,000,000 members of Protestant churches, apologized for the backwardness of the church in recognizing the justice of the demands of trade unionism. The church, he said, had been putting over emphasis on the next life and ignoring the present one. There had been a change, however, and the church was now alive to its social duties.

Church Friend of Labor.  
Bishop John P. Carroll of the Catholic diocese of Helena, Mont., delegate of the American Federation of Catholic societies, declared the church had always been the friend of labor.

"The church welcomes the new ally," he said. "The church is the most powerful organization that has ever existed in the history of the world, its patronage, its favor, its help are much to be desired by unionism. It would be very impolitic for labor to favor any theory of economics that would alienate the church."

The bishop said he was moved to convey this warning after reading the report of Fraternal Delegate Perkins on unionism in Germany. The bishop began to read from the report:

"Without in any way discussing or being understood to favor by influence the dual organizations of the so-called Christian unions, the fact that the union (Continued on Page Three)

## Chinese President to Cut Number in Lower House

PEKIN, Nov. 12.—President Yuan Shi Kai intends to summon an administrative council which in addition to transacting state affairs, will draft regulations governing the new parliament. The council will number 17 members, consisting of the cabinet officers and others appointed by the president and the provincial governors, who have already been appointed by him.

Yuan Shi Kai considers the present house of representatives is unwieldy and desires its reduction to 300 members.

The original number of representatives was 595. The powers of the parliament will also be materially curtailed, and the senate will disappear, giving place to the administrative council, which will be a permanent body.

## W. U. ABANDONS FIGHT ON TAXATION IN OKLAHOMA

WASHINGTON, Nov. 12.—The Western Union Telegraph company formally abandoned today its fight in the supreme court against taxes imposed upon it by the various counties in Oklahoma.

The report of the Utah Copper company, of which Charles M. MacNeill is president, shows that the net profit for the third quarter this year was \$22,066,390.31, and that dividends paid amounted to \$1,188,885.31, leaving a net surplus of \$1,019,505.00. This was about \$12,000 less than the second quarter.

The report shows that a total of 22,287,462 pounds of copper was produced, the largest amount for the period this year. The average monthly production of copper was 10,262,484 pounds.

The report of the China Copper company, of which Mr. MacNeill is also president, shows a net profit for the third quarter of \$951,293.93, dividends amounting to \$104,935, and a net surplus over dividend requirements of \$846,358.93 pounds of copper during the quarter, and showed an average monthly production of 5,622,334 pounds, which is the highest for the year.

Following are extracts from the report of the Utah Copper company: During the quarter there was received at both plants a total of 2,037,351 tons of ore as compared with 1,919,214 tons of ore for the previous quarter. Of this tonnage, the Magna plant milled about 36 per cent, and the Arthur plant about 44 per cent. The average grade of the ore was 12.66 per cent copper, as compared with 12.5 per cent for the previous quarter.

## GREEKS BEING ENLISTED TO FIGHT MILITIA AT TRINIDAD

Ignorant Foreigners Are Told the Union Is Stronger Than U. S.; Gov. Ammons Files Suit Against Kenehan

TRINIDAD, Nov. 12.—General Chase stated tonight that he had reliable information that Greeks were being enlisted by a certain Greek leader at the Ladlow tent colony to come to the strike zone and fight the army. The Greek leader is telling his countrymen that the union is stronger than the United States government, and that they can shoot at the work of the strike leaders.

General Chase went to Ladlow today with a detachment of cavalry, after he had been informed that the Agallier and Ladlow strikers were concentrating there, and a close watch is being kept by the military authorities for any outbreak there.

General Chase, the Greek who was enlisted today for being the party who shot the children. A boy had been shot late afternoon on a 1100 foot. Major Honschelder, in command of the troops at Seguido after a search today secured 29 rifles and a quantity of ammunition.

Late this afternoon Captain Nicholson of Forbes discovered a quantity of dynamite in the basement of a stone dwelling of the mill workers at Forbes and is investigating how it came there.

Brings Suit Against Kenehan.  
DENVER, Nov. 12.—For the first time in the history of Colorado the state executive has brought suit against an administration official to compel him to perform an official function, when late this afternoon, Governor E. M. Ammons petitioned the state supreme court for the right to file a mandamus petition to force State Auditor Kenehan to sign certificates of indebtedness for the maintenance of the state troops in the coal strike territory. The suit is brought in the name of the governor against Rody Kenehan, auditor for the state of Colorado.

The petition sets forth the fact that the troops were sent into the strike zone after it had been declared that civil authorities were unable to prevent violence and murder and destruction of property, and that such a condition prevailed as to make it absolutely necessary to take the troops to the trouble zone. It declares that the state auditor has consistently refused to approve the certificates of indebtedness for the support of the troops and pays relief to the strikers, and that the auditor is in violation of the law in failing to do so.

Attorney General Farrar chose to prosecute the suit for the governor, rather than to defend it for the auditor. Hearing on the petition for permission to file the suit will begin tomorrow morning.

Have Conference Today.  
DENVER, Nov. 12.—Representative coal mine strikers, officials of coal operating companies, Governor Ammons and commercial organizations in the state will meet with editors of newspapers of Denver and state tomorrow morning in an attempt to find some fundamental basis upon which to establish a settlement of the coal strike in District 13. No union officials have been asked to attend the meeting.

DULUTH, Minn., Nov. 12.—Storm swept and anchored, a large fleet of boats arrived in the Duluth-Superior harbor today from Ironquits Point, Lake Superior, where the vessels had taken shelter during the recent storm.

CLEVELAND, O., Nov. 12.—The work of restoring Cleveland to normal order proceeded rapidly today. Supplies of coal and food began to come in and inconveniences due to the recent blizzard rapidly were eliminated.

## AMERICAN EXPORTERS ASK LOWER RATES IN GERMANY

WASHINGTON, Nov. 12.—Application by the United States for the extension to American exporters of the same privileges as those enjoyed by the Swedish and Japanese trade on goods entering Germany, was made through the American embassy to the German foreign office recently, as a result of many protests from American business men. It was alleged that preferential rates on whole classes of commodities extended to Swedish and Japanese merchants made American competition in the German market practically impossible.

## UTAH COPPER SHOWS PROFIT OF MORE THAN TWO MILLION FOR THIRD QUARTER OF YEAR

Reports of C. M. MacNeill and D. C. Jackling Just Issued; Chino Also Big Producer

The report of the Utah Copper company, of which Charles M. MacNeill is president, shows that the net profit for the third quarter this year was \$22,066,390.31, and that dividends paid amounted to \$1,188,885.31, leaving a net surplus of \$1,019,505.00. This was about \$12,000 less than the second quarter.

The report shows that a total of 22,287,462 pounds of copper was produced, the largest amount for the period this year. The average monthly production of copper was 10,262,484 pounds.

The report of the China Copper company, of which Mr. MacNeill is also president, shows a net profit for the third quarter of \$951,293.93, dividends amounting to \$104,935, and a net surplus over dividend requirements of \$846,358.93 pounds of copper during the quarter, and showed an average monthly production of 5,622,334 pounds, which is the highest for the year.

# FOR DANDRUFF, FALLING HAIR OR ITCHY SCALP--25 CENT DANDRINE

Girls! Girls! Save your hair! It's it goes luxuriant and beautiful

If you care for heavy hair, that shines with beauty and is radiant with life, has an incomparable softness and is fluffy and lustrous, try Dandruff.

Just one application doubles the beauty of your hair, besides it immediately dissolves every particle of dandruff, you cannot have nice, healthy hair if you have dandruff. This destructive scourge robs the hair of its lustre, its strength and the very life.

Charles G. Gates, Advocate of "Speed Life," Dead at 37, Leaves Widow Large Fortune

Charles G. Gates, widow of the son of John W. Gates, the high court of her young husband suddenly in Wyoming, comes into a large estate in the world, unless the will of young Mr. Gates leaves it all to his mother, Mrs. John W. Gates.

Mr. Gates was only 37 years old when he dropped dead at Cody, after a wonderful hunting trip in the Rocky mountains. Mrs. Gates was 32 years old when she married Mr. Gates in St. Louis. They had three children, a son and two daughters.

The widow left by the young millionaire was Miss Florence Hayswood of Minneapolis, whom he married in September, 1911. The news of the tragedy came while the young man was in Paris in connection with the death of his father.

## 300 Dead and Town in Ruins as the Result of an Earthquake in Peru

LIMA, Peru, Nov. 12.—Official telegrams report a continuing of an earthquake in the province of Ayacucho, in the department of Apurimac. The city of Chalhuancho, capital of the province, with a population of nearly 400, is reported to be in ruins.

A private telegram says that the death number is more than 200. Ayacucho is a southwestern department of Peru, with a population of nearly 200,000.

## WILSON INTENDS TO NOMINATE PINDLE

Much Discussed Letter From Senator Pindle Will Not Influence President

WASHINGTON, Nov. 12.—Henry M. Pindle, the Peoria, Ill., publisher, will be nominated for ambassador to Russia and the recently published correspondence which was alleged to have passed between him and Senator Lewis will not influence the president's decision. Secretary Bryan today issued a statement, which said in part:

"Mr. Pindle did not seek the appointment. It was tendered him without any solicitation on his part. In response to the offer he frankly stated that he would be glad to serve the administration, but that he did not feel that he could conscientiously obligate himself to serve the full ordinary term of a foreign appointment. The president asked him to accept it for as long a time as he could stay, and he consented."

"This is a statement of a matter which has been grossly misrepresented. The president will not allow malicious representations to interfere with his right to nominate to the senate the best qualified men within his choice for conspicuous and responsible positions."

Senator James Hamilton Lewis issued a statement tonight explaining the much-discussed letter from him to James M. Pindle. He asserted a discharged employe of his Washington office, invented the letter, attempting to quote some of the words from letters which the senator actually had written to the Illinois editor.

Lewis issued statement. Senator Lewis said the appointment of Mr. Pindle being assured, it is "but fair for me to state that if the newspapers have published a letter that was misleading and misrepresenting, it is as it appeared to be either my statements or as coming from me, I am responsible for this and not the papers."

Concerning the correspondence with Mr. Pindle, Senator Lewis said: "The creation of these letters assumed to have been from me to Mr. Pindle, as published, now develops to have been the result of a collusion on the part of a former employe of my office in Washington who had previously forged my name to check books, had been discharged, but who was being protected by his family, and other of his confederates. They were then sent to the state of Illinois, where the letters were being distributed to the press."

"However, the language used and the phrasing in the invented letters were so foreign to anything ever said by me, that for three weeks throughout the country he had been unsuccessful. Later through cooperation of some enemies of Mr. Pindle in Illinois as I am informed) who couched that such letters had been sent, either in the person of Mr. Pindle, or had been received by him as having been received by me, that for three weeks throughout the country he had been unsuccessful."

A tight feeling in the chest accompanied by a short, dry cough, indicates an inflamed condition in the lungs. To relieve it buy the dollar size BALDWIN'S HOREHOUND SYRUP; you get with each bottle a free HERRICK'S RED PEPPER POROUS PLASTER for the chest. The syrup relaxes the inflammation and the plaster draws out the inflammation. It is an ideal combination for curing colds settled in the lungs. Sold by all druggists. Adv.

## BREAKS A COLD NEEDS NO HELP

"Pape's Cold Compound" ends severe colds or grippe in 12 hours

You can end grippe and break up a severe cold either in head, chest, body or limbs, by taking a dose of "Pape's Cold Compound" every two hours until three doses are taken. It promptly opens clogged-up nostrils and air passages in the head, stops nearly discharged or nose running, relieves sick headache, dullness, sore throat, sore chest, coughing, sneezing and stiffness.

Don't stay stuffed-up! Quit blowing and sniffing! Ease your throat, break nothing else in the world, except a cold, by taking a dose of "Pape's Cold Compound," which costs only 25 cents at any drug store. It acts without violence, tastes nice, and causes no inconvenience. Be sure you get the genuine.

## AMERICAN PROPOSAL

(Continued From Page One)

tous event in their history. Their people frankly believed that it was making history, and that on its outcome depended not merely victory or defeat for a single political party of Mexico, but possibly peace or war for two countries, and probably the salvation or destruction of a nation.

No Ceremony at Conference. The conference was held amid the simplest surroundings. There were no uniforms, no ceremony. Mr. Hale, accompanied by American Consul Frederic A. Smith, entered the custom house and was ushered into the tiny room. He found a straight-backed chair in the middle of the room. The only decoration was a gilded coat of arms of the republic of Mexico. This hung over the place reserved for General Carranza.

Mr. Hale, dressed in traveling clothes, was surrounded by Mexican in black coats and gray. Ignacio Bonilla, an American university student and Carranza's minister of finance and communications, was the official interpreter for the American. General Carranza took President Wilson's proposition from Mr. Hale and in 1913 presented it to the rebel army.

At 10 o'clock the men were seated at a long table. A group of anxious men stood by the patio of the custom house. The American minister of finance and communications, Mr. Hale, and the Mexican minister of finance and communications, Mr. Bonilla, were seated at the head of the table. The rest of the men were seated at the long table.

General Carranza and his associates appeared highly pleased with their conference with Mr. Hale, and among the important chiefs here a spirit of optimism prevailed.

Regardless of the result of the conference they expect great satisfaction at the attention paid to their cause by President Wilson in the sending of his personal representative to confer with their civil chiefs, which they considered equivalent to recognition of their revolution as a different character from all others since the ascendancy of Madero to the presidency.

## BANKING COMMITTEE IS GIVEN MORE TIME

Won't Attempt to Pass Measure Through Senate by Means of Censure

WASHINGTON, Nov. 12.—The attempt to force the administration currency bill through the senate by way of the Democratic caucus was abandoned today, and the banking and currency committee of the senate was given time for further consideration of the bill. A practical agreement by six Democratic senators, half of the committee, and hope for a final report within five or six days, was reported to the Democratic conference when it met today by Senator Owen, and, at his request, took no action.

Since the bill for the vote was issued, Senators Reed and O'Gorman had joined Chairman Owen, and Senators Johnson, Shafroth and Hollis in support of the administration measure, despite their vote against some of its provisions in the committee. These six Democrats have virtually agreed on a bill which meets the views of President Wilson. This measure will be taken before the senate as soon as possible.

A further attempt to swing Senator Hitchcock of Nebraska in line with his Democratic colleagues was made in a meeting of Democrats of the committee after the conference, but Senator Hitchcock insisted he could not reconcile his views with the demands of the president. The full committee, Democrats and Republicans, will meet tomorrow and another attempt will be made to secure an agreement.

## WILSON SCORES

(Continued From Page One)

Wilson was and are to be given credit for the success of the currency bill. Here a large body of Socialists in the visitors' section burst into a yell and the bishop was obliged to stop reading. The violent group suggested the disorder, and the bishop, without even looking at his text, uttered a few words of prayer and then, without a word, he left the room.

The whole convention applauded this. Secretary Wilson, in addressing the convention, said: "The department of labor, as now organized and directed, will be utilized to cooperate with the great trade union movement in its effort to elevate the standard of human society."

"One of the general duties imposed upon the department under its organic law is the duty of protecting the welfare of wage workers."

"The one great public duty imposed upon the department is the duty to act as a mediator in trade disputes, to appoint commissioners of conciliation in trade disputes."

Of the situation at Calumet, the secretary said it had heretofore been the custom to investigate wages, hours and conditions of labor and report these to the public. This time, he said, it had been determined to go a step farther and investigate the earnings of the corporations involved.

## SHOULD HAVE BUILT ROADS INSTEAD OF PANAMA CANAL

Master of National Grange Believes Government Should Create Benefits Nearer Home

MANCHESTER, N. H., Nov. 12.—The labor and money spent on the Panama canal might have been used to better purpose on the highways of this country. Oliver Wilson of Illinois, master of the National Grange, told the delegates to the national convention of the Patrons of Husbandry in his annual report.

"The building of the Panama canal is a national project of which all Americans are proud, yet the same amount of labor and money spent on our highways at home would create benefits nearer, and probably more important, to our own people," he said.

Master Wilson declared that the federal government almost ignored the question of transportation between the country home and the railroad, the farm and the business center, except to give advice on road construction. "The National Grange," he said, "should urge the employment of private in preparation of road material, and in actual road work, under the honor system."

Mr. Wilson said he submitted the view from the viewpoint of the farmer regarding rural credits, saying: "I believe any rural credit system should make it easy and safe for a farmer to borrow money to buy or improve his land or equipment to operate the same."

"Long-time credit at the lowest possible rate should be available for the farmer who desires it."

"The so-called rural credit commission that was sent to Europe had among its members, but very few representatives of agriculture; consequently we can expect but little, if any, benefit from its report."

"Any system under private control, operated as a special privilege, would ultimately prove a detriment to agriculture."

am opposed to any rural credit system of any other system of finance that separates farmers from other business men. All that we ask for the farmer is equal opportunity with all other business men."

**THE STORY GROWS**

From the Los Angeles Herald.

The reporter was all agog (as he would not have said) with excitement. "A man was held up and robbed of the ring he was taking to his sweet-heart."

"Three links," growled the city editor (a bear market), "grewled the city editor (a bear market)."

"And he believed him!"

"Three columns," yelled the city editor (a bull market).

**MANTELL'S MACBETH IS WORK OF GREAT ARTIST**

Gifted Author Adds to Triumph in Wonderful Rendition of Shakespearian Tragedy.

By JAMES W. PARK  
A large and representative audience at the Opera house last night, enjoyed the best performance of Macbeth ever given in this city. Mr. Mantell's acting was a joy to behold and the work of his supporting cast was up to the standard set by its chief. The excellent scenes were many, flaws in the production few. To students, teachers and all who love the best in dramatic art, Macbeth was a great treat.

Mr. Mantell stands today at the top of his profession. He has devoted a lifetime to the study and interpretation of Shakespearian art, and in this field has, probably, no living superior and few equals, and truly he is deserving of great success, for he has placed art above dollars.

His work last night was most satisfying. At times he did not appear quite at his best, as though he was suffering from a severe cold. But he gave a sympathetic, well-founded interpretation of Macbeth. His Macbeth is not a melodramatic villain, but a real human being whom we cannot wholly despise even at his worst.

Miss Lawton as Lady Macbeth was truly splendid. How could she have been better? Every line was clearly and effectively spoken by the actress, who has a full appreciation of the marvelous character she portrays. Miss Lawton was particularly effective in the banquet and sleep-walking scenes.

Mr. Lieber as Macduff made a hit with the audience, proving a splendid foil for Mr. Mantell's Macbeth. Mr. Mantell and Mr. Lieber have worked together long that they are wholly in sympathy with each other, hence their "team work" is unusually good.

The parts of Malcolm and Banquo were well handled by Mr. Lindsey and Mr. Burke. Other parts well taken were those of King Duncan, the porter and the witches.

The flaws in the presentation of the play were, as previously has been said, comparatively unimportant. Perhaps the most noticeable were occasional slips in accent which marred the smooth flow of the blank verse. But these were infrequent. Because of the unusual opportunity of hearing the great play adequately presented, one is prone to overlook the little defects and remembers with delight only the excellencies. In last night's play the latter were many.

In damp, chilly weather there is always a large demand for BALLARD'S SNOW LIMENT because many people who know by experience its great relieving power in rheumatic aches and pains, prepare to apply it at the first twinge. Price 25c, 50c and \$1.00 per bottle. Sold by all druggists. Adv.

**WILSON WILL DEFINE**

(Continued From Page One.)  
must be acceptable to the Constitutionalists if the latter are to stop fighting.

Close observers of the situation pointed out that the United States was in a better position today to bring about an understanding between the Constitutionalists and the authorities at Mexico City than has been possible since the United States first intervened its good offices to solve the situation.

The conference today at Nogales, Sonora, between William Bayard Hale and General Carranza and the members of the Constitutional cabinet opened the way for a direct line of communication between the Constitutionalists and the Mexico City authorities. Peace commissions have endeavored in vain heretofore to establish a line of diplomatic parley between the two sides.

**Huerta Urged to Retire.**  
One of the difficulties hitherto encountered in attempting to get the two sides to the point of discussing an armistice has been the difficulty of telegraphic communications. With the United States as a medium of communication, it is though possible that Carranza might indicate who would be acceptable to him as a successor to Huerta if the latter finally yields to the persuasion of some of his friends and retires. Word reached Washington today that officials close to Huerta were urging him to retire, but no official information on the subject was divulged here.

Secretary Bryan was in conference with many South American diplomats today, but he said the only subject discussed was arrangements of the pan-American congress at Santiago, Chile, next year. It had been thought that he would avail himself of the opportunity to inform some of the South American diplomats of the Mexican policy, as he did when he summoned five Central Americans on Monday. It is understood that Mr. Bryan, however, is communicating individually with South American representatives.

It was learned today that only a broad general view of the intentions of the United States has been given foreign diplomats here. No information has been given them of specific steps planned for the future.

Viscount Chinda, the Japanese ambassador, discussed the situation at some length with Mr. Bryan. His call was chiefly to inform the state department officially of the dispatch of the armored cruiser Izumi to Mexico.

Talk of lifting the embargo on arms was heard again today in official circles. Representative Mann, Republican leader, said so far as the Republicans were concerned, there was no sentiment in favor of letting down the bars. He said it would be just as safe to allow the issuance of arms to Mexicanism as to the bandits in Carranza's army.

**FOR CHILDREN THERE IS NOTHING BETTER**  
A cough medicine for children must help their coughs and colds without bad effects on their little stomachs and bowels. Foley's Honey and Tar exactly fills this need. No opiates, no sour stomach, no constipation follows its use. Stuffy colds, wheezy breathings, coughs and croup are all quickly helped, and sweet, refreshing slumbers instead of feverish tossing at night. It is easy, therefore, to understand why an increasing number of bottles of Foley's Honey and Tar Compound is sold yearly. Robinson Drug Co., Adv.

**UTAH COPPER**

(Continued From Page One.)

ings in Utah, including those from the Bingham & Garfield railway, were credited to the cost of operating the net cost per pound for the quarter would be 8.187 cents. The fine grade of the ore treated was responsive for the comparatively high cost of production.

The following tabulation shows the financial results of the operations of four quarters for the quarter as compared with the second quarter of the year:

	Third Quarter.	Second Quarter.
Net profit from milling operations.....	\$1,819,354.41	\$1,831,700.39
Mine income, rents, etc., in Utah.....	11,887.56	11,991.78
Income from Nevada Con. Copper Co. dividends.....	35,181.50	35,181.50
Total net profit.....	\$2,208,393.51	\$2,208,393.51
Dividends paid.....	1,188,632.50	1,188,632.50

Net surplus for the quarter, \$1,019,761.01. The earnings for the quarter as computed on the basis of 15 cents per pound for copper. The total amount of copper on hand and in transit (sold and unsold) at the end of the quarter was 32,083,789 pounds. The unsold portion of copper on hand and in transit is inventoried at slightly under 13½ cents per pound. At the close of the quarter, no copper due for delivery from the refinery remained unsold.

Both plants were in continuous operation throughout the quarter, and exceeded all previous records as to tonnage handled, having averaged a little over 22,000 tons per day for the quarter. During the month of September, the plants milled an average of about 24,000 tons daily.

Good progress was made in stripping. During the period, there was removed a total of 1,422,284 cubic yards of stripping, as compared with 1,235,343 cubic yards removed during the second quarter of 1913, being an increase of 186,941 cubic yards.

The Bingham & Garfield railway handled the largest tonnage of ore and commercial freight in its history, an average of 16,018 tons of ore per day having been transported from the mines to the mills, as compared with an average of 14,858 tons per day for the previous quarter. An average of 2,385 tons per day of other freight was transported over the line, as compared with 1,928 tons per day for the second quarter of 1913. The passenger receipts for the quarter were the largest in the history of the road.

Respectfully submitted,  
C. M. MACNEILL,  
President.  
D. C. JACKLING,  
Managing Director.

The report of the China company, in part, is as follows:  
The total amount of ore milled during the quarter was 307,550 dry tons; an average of 5,518 tons per day, as compared with 54,959 tons, corresponding to a daily average of 4,418 tons for the previous quarter, and 429,730 dry tons, a daily average of 4,756 tons for the first quarter of 1913. Forty-seven per cent of the quarter's tonnage was produced from the Hearst Treble and was of a fair concentrating quality, although containing more than a usually high percentage of iron sulphides, and produced a lower grade of concentrate. Thirty-six per cent of the quarter's tonnage was supplied from the northerly portion of the property, considerable amount coming from the fine ore, and containing some oxidized ore. The remaining 17 per cent was supplied from the northerly ore body and came from the stripping edge, some of the material running very high in iron and manganese, and making a very low grade of concentrate.

The average percentage of copper contained in the ore treated for the third quarter was 2.23 per cent, as against 1.88 per cent for the previous quarter and 1.91 per cent for the first quarter of 1913. The average extraction for the quarter was 60 per cent, corresponding to a recovery of 29.95 pounds of copper per ton of ore milled, as compared with an average extraction for the previous quarter of 64.48 per cent, corresponding to a recovery of 24.33 pounds of copper per ton of ore milled.

The average grade of the concentrates produced for this quarter was 14.46 per cent copper, as against 15.72 per cent for the previous quarter.

The cost per pound of net copper produced for the quarter, after allowing for amortization and depletion, and without making any credit for plant expenses, was \$4.11 per pound, as compared with \$3.91 cents per pound for the previous quarter and \$4.24 cents per pound for the first quarter of 1913. If miscellaneous earnings were used as a credit, the cost of producing copper, such credit would amount to 0.33 cents per pound, bringing the net cost of copper for the quarter down to \$3.08 cents per pound.

The financial results of the company's operations for the current and preceding quarter of 1913 are as follows:

	Third Quarter 1913.	Second Quarter 1913.
Net profit from milling operations.....	\$91,283.03	\$82,052.25
Mine income, rents, etc., in Utah.....	42,366.51	34,705.40
Total.....	\$94,889.54	\$71,757.73
Dividends paid.....	\$42,573.69	\$29,730.00

Net surplus for dividend requirements..... \$52,315.85. At the close of the quarter the total amount of copper on hand and in transit (sold and unsold) was 19,440,748 pounds. The unsold portion of copper on hand and in transit is inventoried at 13.30 cents per pound.

During the quarter additional first mortgage bonds were sold to the amount of \$14,000, leaving outstanding only \$275,000 payable of the original issue of \$289,000 convertible bonds.

During the quarter there was removed by the steam shovels, a total of 1,128,688 cubic yards of material in place, an average of 74,285 cubic yards per month, or 1,057,044 cubic yards were stripped, the remainder being equivalent to 10,185 tons of ore.

During the quarter, and at the time of writing this report, all operating factors have been satisfactory, with the exception of the low-grade concentrates. This, as has been explained, is due to the abnormally large percentage of iron, which the form of sulphides is contained in the ore from the areas from which it has been necessary for us to produce our output. As a result of the lower grade and consequent greater cost of concentrates produced, the smelter costs per pound of copper were unusually high and the total per pound cost correspondingly so. As larger working areas become available, thus permitting a more uniform mixture of concentrates, the grade of concentrates will improve.

Respectfully submitted,  
C. M. MACNEILL,  
President.  
D. C. JACKLING,  
Managing Director.

**THE HUB**  
Men's Apparel of the Better Sort.

**TO CONNOISSEURS OF EXCLUSIVE WEAR FOR MEN**

Our attitude is one of service: we feel no other organization has a keener desire, greater ability or better facility to serve men, old and young, as they should be served.

This week, throughout our store and in our show windows, we have arranged displays of the smartest and most exclusive apparel that has been shown in this city. No possible accessory to the complete and proper outfitting of men is missing from this exposition.

Particular men with a desire for smart raiment are making their way here: they know that we are always first to show the advanced styles and that New York with its Fifth Avenue is brought to their hand.

Make tomorrow a day of inspection.

**THE HUB**  
Exchange Bank Bldg.

**BELIEVE REST LAW**

(Continued From Page One.)  
violation, so that the question involved was purely one of law. While I do not agree with either the reasoning or the conclusion arrived at by Judge Kinney, still I think that this council should carefully consider the question before it directs me to take the case to the supreme court. While there is much in the Morgan case and the Lochner case, cited by Judge Kinney as authority against the validity of the ordinance, to sustain his position, and I do believe these cases are entirely in point and I believe that our supreme court would reverse the ruling of the county court. The Morgan case involved an eight hour law in this state. The Lochner case is the New York baker case, that has been discussed considerably and in which five judges of the United States supreme court held that the New York law was invalid and four dissented from that conclusion. I do not think Judge Kinney suggests a question of law, but merely states that a certain section of it shall not prohibit hotels, restaurants, etc., from keeping open on Sunday. It is no way gives them any additional right, but simply states that their keeping open does not violate this ordinance. I do not see how the court can construe that as a permission to violate a state law.

The serious defect, it seems to me, in this ordinance is that it is neither a so-called Sunday ordinance nor a one day rest in seven ordinance, because it does not provide for a full day of rest, but simply states that the employee must have off "as many working hours during the preceding six days as he is required to work on Sunday." And the question arises whether if the ordinance was carried to the supreme court and the opinion of the county court reversed it could be enforced so as to accomplish any real good to this community. What constitutes working hours or a work day is in no way set forth in the ordinance. If an employer desiring to work his employees ten hours every day including Sunday employed them to work for him say twelve hours in a written contract, and then stated each will have to work on Sunday ten hours, but I will give you two hours off your twelve hour day on the six week days, the ordinance might be complied with and result in absolutely no good to the employee. It would probably be a question for a judge in such a case to determine whether there had been a bona fide reduction from the working hours. Except in the case of women there is little, if anything, to prevent a reemployment of employees who are working seven days a week to permit this kind of doing. The eight hour law would probably apply to women and prevent such a reemployment, but this ordinance exempts the domestics and a great many of the women who work say seven days in the week, think women clerks and employes in most every work except hotels and restaurants, already get a day off, so that the ordinance if held valid could probably be effectively enforced only as to the women employes in hotels and restaurants.

I might further state that only one complaint has come to me since the enactment of this ordinance that I thought was directly from the employee. In that case a man's wife complained that he was being employed twelve hours a day for seven days in the week.

I have compared the ordinance with the standard bill for one day of rest in seven prepared by the American Association for Labor Legislation, and confess the ordinance has little, if any, similarity with that standard bill. This bill is limited to factory or mercantile establishments and provides for twenty-four consecutive

**Colorado Shield Finally Placed With Others in Washington Monument**

WASHINGTON, Nov. 12. After a long delay, Colorado's shield finally has been placed in the Washington monument, along with those of other states, to the memory of the first

president. The shield is concealed in draperies, now that the Masons have set it in the side of the towering obelisk but it is to be unveiled in the near future.

Senator Shafroth of Colorado will set the date for the ceremony within the next few days.

Colorado's contribution is chiseled from a handsome block of Colorado Yule marble, mined in the Sopris national forest. It is two by four feet and the name and seal of the state are inscribed thereon, together with the year the state was admitted to the Union.

The shield is located on the 290-foot landing of the monument and is one of the highest of shields that decorate the lower part of the structure.

Grand Rapids, Mich., has a printing department in the junior high school. It is for three distinct classes of students. First, the part-time boy, who attends half a day a week without loss of pay from his regular employment; second, the boy who is there all the time and is learning the trade; third, the boy who takes an hour or two a week to find out whether he wants to follow printing as a life work.

# UNCONVERTED WIFE ALWAYS RUINS CHRISTIAN HUSBAND, EVANGELIST WARNS CONGREGATION

Dr. Pratt, Preaching About Women of Smart Set, Says They Have Little Christianity

Though his subject last night was "The Woman of the Smart Set in the Colorado Springs churches," the Rev. Benjamin Pratt digressed to a considerable extent, in order to warn all those connected with the revival services that there must be no pulling and hauling between the various churches engaged for converts. He asserted that he made it an invariable rule that after the meetings were ended no convert must be asked to join a church. For his sermon last night, to an audience that packed the Presbyterian church back to the farthest Sunday school room, he took the story of Lot and Abraham, with Lot's settlement in Sodom. He commended to all church members the example of Abraham, who refused to quarrel with Lot, giving up all the rich plains of the Jordan rather than fight.

"There never was a sectarian," he declared, "who was a real Christian. The sectarian has emphasis on non-essentials; the real Christian has emphasis on the fundamentals of God and his son. The day of debates between churches on questions of church polity was the dark ages of the church. If you want a jubilee in hell, just start a fight between church members."

her power over unsaved men for their redemption. They lose their power and influence even over their own children. Our boys and girls as they look over the stubs of our check-books know what we think about this.

**Lack Spiritual Power**

Worldly Christians may be good church members, but they have no spiritual power. They may give money, they may be generous in work, they may do anything that is asked of them, but none of these things take spiritual power. Any sinner could do as much. But it does take spiritual power a life that is right to pray prevailingly for the salvation of men.

In all my travels I have never found a dancing card-playing, theater-going, money-loving worldly Christian who had enough power to break the hind leg of a microphone.

Mr. Pratt stated that the announcement that had appeared in the papers, to the effect that the services for the last 10 days of the revival would be held in the Presbyterian church was a mistake. "We don't know how long the services will last," he said. "We shall probably be here two or three weeks longer. We haven't got started yet."

He announced that the subject of his sermon for tonight would be "The Christian Who Makes God Sick at His Stomach." The meeting will be held in the Presbyterian church.

# CHAMBER OF COMMERCE AGAINST CITY AUTO TAX

Directors of Opinion That Levy Should Be Dropped. New Members to Be Entertained at Smoker.

Approval of a petition of automobile owners and others that the tax on autos be removed was expressed at a meeting of the board of directors of the Chamber of Commerce held yesterday. The directors also approved the request of real estate men that a reward be offered for the conviction of any person damaging vacant property in the city.

The 256 new members of the chamber will be entertained at a smoker to be given soon, according to plans discussed at the meeting. The affair will be in the nature of a welcome luncheon. The work of securing the 44 remaining members to make the membership 1,000 is still in progress.

Secretary Henderson was instructed to attend the good roads meeting at Denver today and a similar meeting at Norton, Kan., November 28. The educational committee reported that it has been conferring with members of the board of education regarding the school budget for next year which probably will be adopted by the board this week.

The entertainment committee was instructed to meet the Rock Island of fields when they arrive here Sunday afternoon on a trip of inspection.

## Wilbur's 400 Dresses for Girls

A great special purchase of wash dresses, one of the best lots we have secured in many a day. Dozens of different styles, ranging from the plainer effects to those neatly and appropriately trimmed. All the good wash materials are represented and the color effects run from medium to dark, in plaids, stripes and fancies. These are the best fitting and best made garments on the market and at regular prices the greatest values sold anywhere. For Thursday, Friday and Saturday these dresses, arranged in two lots, the 1.25 and 1.50 values selling at 95c and the 2.00 values for 1.45 each.

Sizes 6, 8, 10, 12, and 14.  
See Window.

**95c and \$1.45**

## 23.50 Sale of Suits, Dresses and Coats

The unusually good values and the wide assortment has made this one of the most attractive offerings of the season. Nearly every woman, who is enough interested to inspect these garments, becomes the owner of one or more of them. These garments represent the season's best models, newest colorings and most desirable fabrics in fact are absolutely correct in every particular. During the rest of this week choose from this lot of

**27.50, \$30, 32.50, \$35, 37.50 and \$40 Values for \$23.50**

# WILL NOT ACT OFFICIALLY IN COAL STRIKE MATTER

Chamber of Commerce Decides Not to Take Up Arbitration as Asked by Trades Council.

Feeling that the matter of inducing the conflicting sides in the present coal strike to arbitrate is not within the scope of its authority, the Chamber of Commerce, acting through its board of directors, yesterday adopted resolutions that the body should not interfere in the present strike. It was the opinion of the directors that the federal and state authorities are already conducting a more thorough investigation than that it would be possible for any chamber of commerce to carry on.

The resolutions adopted came as a result of a set of resolutions recently passed by the Federated Trades Council, wherein the Chamber of Commerce was requested to appoint a committee to immediately take up the question of arbitration between the coal miners and their employers, and to investigate the recent advance in the retail prices of coal in this district.

**Reply to Trade Council.**

The Chamber of Commerce through a special committee and through similar chambers of commerce throughout the state, has kept in touch with the coal strike situation since the beginning of the controversy. The resolutions adopted yesterday are as follows:

Whereas a copy of a resolution by the Federated Trades Council has been submitted requesting the Chamber of Commerce to appoint a committee to immediately take up the question of arbitration between the coal miners and their employers, and to investigate the recent advance in the retail prices of coal in this district, and

Whereas the Chamber of Commerce through a special committee and through similar chambers of commerce throughout the state, has kept in touch with the situation since the beginning of the controversy, and

Whereas not only the Federated Trades Council but the Chamber of Commerce is confronted by the fact that a statewide coal strike of supreme importance to every citizen is now in progress, and

Whereas this Chamber of Commerce stands ready now as it did at the time of the street railway strike last summer to use its best efforts to suppress disorder and advance the best interests of every individual member of this community, and

Whereas it does not appear that we can serve our membership or that part of the community not personally interested in the outcome of the present conflict by attempting to arbitrate a statewide controversy, and

Whereas both federal and state authorities are already conducting a more thorough investigation than would be possible to any chamber of commerce, now therefore be it

Resolved That the Chamber of Commerce acting through its board of directors considers that the interests of its membership and the interests of the community generally, and the duty advanced by any present effort of this chamber to take up the question of arbitration.

That the Chamber of Commerce stands ready to take any action necessary to protect the interests of the community at large which may be threatened by this or any future strike controversy.

That the Chamber of Commerce will not act officially in the coal strike matter.

# In Spite of the Fire

# Springs Girl Goes to War Department

Miss Theresa Woolsey, who has lived in Colorado Springs for 15 years and who has been stenographer in the law offices of McKesson & Turner for some time, yesterday received a telegram from the war department at Washington, asking her to report there at once for duty. Miss Woolsey recently took the examinations for the position under the civil service board and according to word received here the department was pleased with the excellence of her examination.

Miss Woolsey has cared for her mother and herself for years as well as securing her education. She and her mother will leave for Washington today.

# WOMANHOOD OR MOINERHOOD

The women who have used Dr. Pierce's Favorite Prescription will tell you that it freed them from pain—helped them over painful periods in their life and saved them many a day of anguish and misery. This tonic, in liquid form, was devised over 40 years ago for the womanly system, by R. V. Pierce, M. D., and has been sold ever since by dealers in medicine to the benefit of many thousands of women.

Now—if you prefer—you can obtain Dr. Pierce's Favorite Prescription tablets at your druggist at \$1 per box, also in 50c size or send 50 cents straight to Dr. R. V. Pierce, New York, for trial box.

# NEW ORDINANCE PROVIDES PLAYGROUNDS COMMISSION

Council Passes Measure on First Reading—City Now Has Four Commissioners.

A new ordinance providing for the establishment of a playgrounds commission for Colorado Springs was passed on first reading by the city council yesterday and ordered sent to the printer. By passing the ordinance the council took the first step toward creating another commission. The ordinance was recommended by the Department and Recreation commission.

The new commission will have five members, and will be given power to spend the money the mayor is going to include in the budget for the support of playgrounds. The city now has four commissions, the civil service, the city planning, the union depot, and the recreations and amusements commissions.

Public Accountant John H. Baker, who has recently gone over the books of the police court, made his report to the council yesterday. The accountant finds that during the period from January 1 to June 30, 1913, there were 55 cases in which the fines and costs totaled \$219.00, and in which the defendants were allowed to go out and get the money. He finds that, of these, 46 failed to return, and the fines were not paid. The accountant suggested that this condition indicated no laxity in handling the affairs of the police court. Defendants are sometimes given heavy sentences and then allowed to go. This being considered, a good way to get them to leave the city. He advised that rotations be made in these cases and the accounts closed.

After much argument it was voted to pay a debt of \$150 owed by the city in connection with the opening of Corona street. The sum had been assessed by the courts against the city, and the attorney's office advised that the amount be paid immediately.

# MUNICIPAL WOOD PILE SUGGESTED BY M'KESSON

Mayor Has Plan Whereby Men Out of Employment and Vagrants Would Be Given Work.

Mayor C. L. McKesson is working on a plan by which he hopes to provide work for the less fortunate of Colorado Springs residents as well as vagrants who are arrested and given sentences. It is the plan of the mayor to provide a municipal woodyard where fuel will be prepared for use.

At yesterday's meeting of the council representatives of the Associated Charities were present and gave reasons why they should have an appropriation of \$750 for charitable purposes. Mayor McKesson suggested the woodyard plan, and it is probable that further investigation of the idea will be made by those interested.

It is planned that the wood will be taken from the vicinity of the city's reservoirs where it is plentiful. The wood will be sold to Colorado Springs people at minimum cost while the worker will receive sufficient money to keep him until he has a better position.

"Every day there are persons who call on my office pleading for work," said Mayor McKesson. "They say they are willing to work for almost anything in order to provide for their families. Men who receive a police court sentence could also be worked in the woodyard."

# BOY ON BICYCLE INJURED IN COLLISION WITH WAGON

Glade Mummah, Aged 9, Struck by Heavy Commission Truck; Wounds Not Serious.

Riding on a bicycle which he had just purchased, Glade Mummah, aged 9 son of Lem Mummah of 424 South El Paso street was struck by a wagon belonging to the Morse Commission company and painfully injured yesterday afternoon. The accident occurred at Kiowa and Tejon streets and the boy was taken to his home in an ambulance.

According to bystanders, the boy was on the right side of the Tejon street going south while the wagon was being driven west. Neither driver nor boy noticed each other until the collision. The boy's left hand was run over by one of the wheels and his face and body were cut and bruised.

# SPRINGS GIRL BREAKS AN ANKLE IN DENVER

Miss Myrtle Spaulding of Colorado Springs, head of the art department in the Wright store in Denver, sustained a fracture of the bones of her left ankle Tuesday night in Denver. Miss Spaulding stepped into a hole as she was returning to her home at 529 Twenty-fifth street. The injury is of serious character, according to the physicians, and it will be several weeks before she regains the use of her foot.

# DERNGOOD TEAS

This is fitting to each one of our 32 kinds of Teas.

Large variety. Yes, But it is our pride to have all the market afford in this line, and the best it affords.

Our TEAS are selected, dried, and shipped to our special order.

They make from 200 to 300 cups to the pound.

Sell from 25c to \$1.00 per pound.

DERN'S  
25 S. Tejon Phone 575

# ROCK ISLAND OFFICIALS ON TRIP OF INSPECTION

Private Car Party Traveling Over System to Spend Sunday in Colorado Springs.

High officials of the Rock Island railroad will be in Colorado Springs Sunday and Monday to spend a holiday, as they put it in a telegram to E. J. Ulrich, president of the El Paso Ice and Coal company. Those in the party will be President H. T. Mudge, T. M. Schumacher, new chairman of the board of control, J. E. Gorman, first vice president, A. C. Ridgeway, second vice president, and John Sebastian, third vice president.

The railroad men will arrive in a special car Sunday afternoon at 2 o'clock and will remain until Monday morning. It is probable that they will play golf on the course of the Colorado Springs Golf club while on their visit here, and that they will be entertained by the Chamber of Commerce.

The officials are on an inspection trip of the entire system. Mr. Mudge, president of the road, is a personal friend of Mr. Ulrich.

# TRAINING SCHOOL LECTURE SUBJECTS ARE ANNOUNCED

The course of lectures to be given in connection with the El Paso county training school for Sunday school teachers on the general subject of "The Social Teaching of the Old Testament Prophets" has been fully arranged for the first semester, which ends with the last Thursday in January. The outlines of the lectures is as follows:

November 13, Introductory. "The Place, Purpose and Power of the Inspired Word," Rev. Samuel Garvin.

November 20, December 4, December 11, December 18, "The Book of Amos," Dean Edward S. Parsons.

January 8, January 15, "The Book of Hosea," Rev. J. H. Spencer.

January 22, January 29, "The Book of Micah," Rev. W. W. Ranney.

There will be no exercises of the training school the evenings of November 27, December 21 and January 1.

The general public is invited to hear the lectures without charge.

# CHARLES DEACON OPENS CAFE IN LOS ANGELES

Charles Deacon, until recently superintendent of the Union Printers' home in this city, has just opened a cafe in Los Angeles. Mr. Deacon was connected with the home here for nearly 15 years and returned last summer on account of the poor health of his wife. The Deacons were well known here and their many friends will be glad to hear of his start in business. The cafe had its formal opening yesterday noon. According to his announcement (cards Mr. Deacon will cater to the merchant trade. The cafe is located at 1650 South Olive street, Los Angeles, Cal.

Mr. Deacon is to have a new railway station to cost \$100,000.

# POLICE BELIEVE HILLEN IS MANITOU MURDERER

Man Under Arrest in Denver Thought to Be Holdup Who Killed Cliff House Watchman.

That Albert Whitehead, night watchman at the Cliff house, in Manitou, was murdered the night of July 12 by Harry Hillen, confessed slayer of Thomas J. Chase in Denver and perpetrator of several holdups in that city, was made almost certain yesterday when E. J. Nichols of the Cliff house, identified Hillen as one who worked at the hotel for two weeks prior to the murder and quit his job the day of the crime.

In the opinion of Chief of Police Alexander Nisbet and Inspector DeLoe, of Denver, Hillen is the Manitou murderer. Nichols said yesterday that Hillen appeared to be the description of a porter who worked for him under the name of James Nelson. Photographs of Hillen were identified as the housekeeper and other employees, and Nichols says that while he does not recollect the man positively, he is certain he has seen him before.

The murderer of Albert Whitehead entered the lobby of the hotel about midnight, July 12 and held up Leon Casser, the night clerk at the point of a revolver. The clerk ducked behind a counter and Whitehead, who came into the lobby at the time started to give an alarm. He was behind the counter and who turned toward the door, was shot and instantly killed. The murderer escaped through the front door.

Tattoo marks on the arm have been an important factor in Hillen's identification as James Nelson.

BIRMINGHAM, Ala., F. L. Williams, of the firm of Hartline & Willis Pharmacists, suffered greatly from rheumatism and bronchitis, so bad he could not attend to business. As he writes: "I got no relief until I took Foley's Honey and Tar Compound. It entirely removed those choking sensations, and never failed to induce an easy and comfortable condition of the throat and lungs. Remember the name Foley's Honey and Tar Compound and accept no substitute. In the yellow package. Robinson Drug Co., Adv."

HK clothes you wear are a very important factor in your success. If they're right, you're right.

NTO these clever fads suits is tailored an individuality, a smartness that'll set you right.

ust received

ipment of sample sheet. In order to save them, out quick we mark down to \$2.00 in all lots. 10c, 6c, 4c and 2c. No freight. Our prices are larger than 75c. Our are guaranteed; we have many and shoemakers to make them. P. Gilbert, 25 E. Huertano St.

CHRISTMAS TREES NOT TO BE SOLD ALONG STREETS

city council yesterday decided to allow Christmas trees to be sold on the streets of Colorado Springs this year. The decision was reached after a resolution of Public Safety John E. Eubank announced that he has received several requests for permission to sell the trees on the streets. Commissioner Johnson said he was in favor of the trees sold on vacant lots.

Commissioner Frost said he was in favor of allowing the trees to be cut at all, but that the cutting might not be helped, the selling might go on. Commissioner Johnson is in favor of the street selling.

Mayor McKee said that it is directly against the spirit of the new sidewalk ordinance. The vote was three against the street selling in favor of it. The trees may be added from house to house.

Time Sores And Ulcers Healed Wounds Often Bother Many Years After.

who have been pouting and sore for years and years and years the way it heals quickly after a day.

you come to realize that the skin beneath is composed of a mass of tiny blood vessels which are wonderful medicinal properties. It is the natural course of the blood stream that follows the course of the nourishing food elements. It is a remarkable remedy. It is the active principle which is to stimulate the healthy action of its own nutritive. And the medicinal action of this medicine purifies the blood and is essential to well-balanced and the nutritious elements of the grains, fats, and sugars of our food.

only this but if from the presence of a distributing poison there is a general interference of nutrition, a bolus, carbuncles, abscesses and a host of other diseases. It is this that this poison is rejected and a new blood is formed.

too soon S. S. has such specific action on these local cells as to purify the natural welfare and a proper action to each other.

it is to stimulate the healthy action of its own nutritive. And the medicinal action of this medicine purifies the blood and is essential to well-balanced and the nutritious elements of the grains, fats, and sugars of our food.

DR. J. F. BOWERS  
BANK BLOCK  
DENVER, COLO.

**SPECIAL CONCERN TO GET FUND FOR SCHOOL PIANO**

In order to raise \$50 toward a new piano for the pupils of the Liller school will give an entertainment in the school building tomorrow night, beginning at 7:30 o'clock. The authorities have promised to purchase a piano for the school provided the students themselves make \$50. The program for the entertainment tomorrow night will include a violin concert and several other musical numbers.

**Two Years With Indigestion.**

"Two years ago I was greatly benefited through using two or three bottles of Chamberlain's Tablets," writes Mrs. M. A. Keller, Elida, Ohio. "Before taking them I was sick for two years with indigestion." Sold by all dealers. Adv.

**HOONDAY MEETINGS DRAW LARGE CROWDS**

Another full house turned out to the noon prayer meeting held by the Y. M. C. A. in the Princess theater. Dr. Samuel Garvin preached the sermon. Today the services will be held at the usual time and will be in charge of the Rev. Benajah Pratt, who is conducting a series of revival services in the city. Mrs. Booth will sing a solo.

The noon meetings are proving extremely popular, and sandwiches and coffee are served each day. The meetings will continue the rest of the week. The Rev. S. E. Brewster of the First Christian church will speak at the meeting tomorrow, and Dr. W. W. Ramsey will have charge of the service on Saturday.

**Money Saved by Taking Your Cough Syrup at Home**

Takes Just a Few Moments, and Stops a Hard Cough in a Hour.

Cough medicine, as a rule, contains a large quantity of plain syrup. If you take one pint of granulated sugar, add 2 1/2 pints of warm water and stir about 2 minutes, you have as good syrup as money could buy.

If you will then put 2 1/2 ounces of Pinex (fifty cents) worth in a pint bottle, and fill it up with the Sugar Syrup, you will have as much cough syrup as you could buy ready made for 82.50. Take a teaspoonful every one, two or three hours. It keeps perfectly. You will find it one of the best cough syrups you ever used, even in whooping cough. You can feel it take hold—usually conquers an ordinary cough in 24 hours. It is just laxative enough, has a good tonic effect, and the taste is pleasant.

It is a splendid remedy, too, for whooping cough, epiglottitis, croup, hoarseness and bronchial asthma.

Pinex is a most valuable concentrated compound of Norway white pine extract, rich in quinine and other healing pine elements. No other preparation will work in this formula.

This plan for making cough remedy with Pinex and Sugar Syrup is now used in more homes than any other cough remedy. The plan has often been initiated but never successfully.

A guarantee of absolute satisfaction, or money promptly refunded, goes with this preparation. Your druggist has Pinex, or will get it for you. If not, send to The Pinex Co., Ft. Wayne, Ind.

**At The Theatre**  
ROBERT B. MANTALL  
AT THE OPERA HOUSE  
MATINEE AND NIGHT

Robert B. Mantall never, in sight of the audience, steps out of the character he is portraying even when responding to applause. It is King Lear who howls, or Othello, or Hamlet, or Richard III. Mr. Mantall believes the actor's personality should be a mystery to his audience, not because of any superiority, but as an aid in sketching a picture.

One of the finest compliments ever paid to Mr. Mantall is contained in a letter written by the late Horace Howard Furness, probably the greatest Shakespearean scholar America has produced, to a friend a few months before his death. "It is indeed gratifying to know," said Dr. Furness simply, "that there is still an actor who is passing on the best traditions of our stage."

Wieda Hignault, Robert B. Mantall's Japanese valet, has a knowledge of

SCENE FROM "BOUGHT AND PAID FOR" OPERA HOUSE NEXT SATURDAY, MATINEE AND NIGHT.

Shakespeare that would make the concordance manufacturer turn green with envy. There is not a "cue" in Mr. Mantall's entire repertoire that Wieda does not know, and the little Jap boy relieves the actor of a great amount of mental aggravation by watching for the "cue" himself.

During his vacations Mr. Mantall does not spend all his time by any means in his well-kept library at Atlantic Highlands, New Jersey, reading Shakespeare and Shakespearean lore. Mr. Mantall is a farmer, and not a mere "gentleman farmer" either. He does not get up at 3 o'clock every morning and sit out on the tall fence waiting for it to get light enough to go to work, but he does wield a hoe or drive a plow when he feels like it. He also goes two or three days without shaving when he isn't expecting company, and has been known to wear collarless shirts turned in at the neck and a broad-brimmed straw hat. The last summer Mr. Mantall made a specialty of raising corn, and his resulting ears became famous through Atlantic Highlands as the finest grown "thereabouts."

**"BOUGHT AND PAID FOR" COMING**

Analyzing the story of "Bought and Paid For" William A. Brady's most recent New York Playhouse success, which comes to the opera house next Saturday, matinee and night, one is forced to the conclusion that George Broadhurst, the author, wrote an exceptionally powerful drama because of the simplicity of his treatment of the theme. The plot is so straightforward that it might be written on a visiting card. The intense interest of the play is in its pointed dialogue and the frank unfolding of his skillfully drawn characters.

The story deals with the marriage of a wealthy man to a telephone operator. She is of humble origin, and into her life of luxury with her sister and brother-in-law. In accepting the proposal of the millionaire, she made no pretense of anything more than admiring and respecting her husband, but in two years this feeling develops into love, which battles with pride, when, in a moment of drunken debauch, he tells her he has bought and paid for her. In her resentment, she leaves her husband and refuses any assistance from him. She becomes a shopgirl, and goes to live with her sister and brother-in-law, whom her husband has elevated to prosperity. Her action in leaving her husband also reduces this pair to poverty again. The brother-in-law, a neurotic, driven to extremity by the loss of his comfortable salary, and knowing that the husband loves his wife, makes one of his characteristic blunders, and thus brings them together again.

"Bought and Paid For" played continuously for over 15 months at the Playhouse, in New York. It enjoyed a year and six months at the Princess theater, Chicago, and Londoners flocked to see it at the New theater, in the British metropolis, for over six months.

**OLE THEOBALDI**

The world's greatest descriptive violinist, Royal chamber musician, Knight of the Royal Order of Ours, Theobaldi is the possessor of 62 gold medals and decorations. His first royal chamber musician to his majesty, Oscar, King of Sweden, and Czars Alexander and Nicholas of Russia, has played by royal command and invitation before many of the greatest potentates and dignitaries of the Old World. At the great congress in Rome, September 26, 1888, King Umberto conferred upon Theobaldi the Order of Ours (the Italian crown adorned with diamonds) and upon the occasion

**"CASCARETS" FOR LIVER--HEADACHE**

You're bilious and constipated. Clean up inside and feel bully

Get a 10-cent box now.

You're bilious! You have a throbbing sensation in your head, a bad taste in your mouth, your eyes burn, your skin is yellow, with dark rings under your eyes; your lips are parched. No wonder you feel ugly, mean and ill-tempered. Your system is full of bile not properly passed off, and what you need is a cleaning up inside. Don't continue being a bilious nuisance to yourself and those who love you, and don't resort to harsh physics that irritate and injure. Remember that most disorders of the stomach, liver and bowels are cured by morning work with gentle thorough Cascarets—they work while you sleep. A 10-cent box from your druggist will keep your liver and bowels clean; stomach sweet, and your head clear for months. Children love to take Cascarets, because they taste good and never gripe or sicken.

**SELDOMRIDGE TO TELL OF TRIP TO PANAMA**

The Panama Canal and Its Relation to Trade will be the subject of a talk to be given by Congressman H. H. Seldomridge at an open meeting of the Federated Trades Council at Carpenters hall at 8 o'clock this evening. The talk will be illustrated with stereopticon views of work on the canal. Mr. Seldomridge will give a detailed description of his trip from the time he sailed from New York, landed in Panama, inspected the canal zone, and returned. The public is invited.

**Sick Headache.**

Sick headache is nearly always caused by disorders of the stomach. Correct them and the periodic attacks of sick headache will disappear. Mrs. John Bishop of Roseville, Ohio, writes: "About a year ago I was troubled with indigestion and had sick headaches that lasted for two or three days at a time. I doctored and tried a number of remedies but nothing helped me until I found one of those sick spells a friend advised me to take Chamberlain's Tablets. This medicine relieved me in a short time." For sale by all dealers.

Such beneficial results have been attained by sufferers from some diseases by spending several hours a day in air saturated with radium emanations that a sanatorium for giving such treatment has been established at Vienna.

**EAT LESS MEAT IF BACK HURTS**

THEY A GREAT OF SALTS TO YOUR KIDNEYS IS BY DR. BOWERS 100

Eating meat regularly eventually produces kidney trouble in some form or other, says a well-known authority. The kidneys, when diseased, excite the system, and the result is a nervous, irritable, and often a morose disposition. The kidneys, when diseased, excite the system, and the result is a nervous, irritable, and often a morose disposition.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used by generations to flush clogged kidneys and stimulate the system to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts cannot injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease. Adv.

**WORK ON COUNTY ROADS NOT TO BE DISCONTINUED**

Work on the county roads is not to be discontinued for the winter, according to Road Overseer W. F. Larabee. At present the road gang is working on the strip of highway between Peyton and Calhan and 40 men and 28 teams are engaged in repairing the road. Six men are working constantly installing concrete bridges and culverts. The men will be kept on the county roads all winter, unless weather conditions make it impossible.

**DOES BACKACHE WORRY YOU?**

Some Colorado Springs People Have Learned How to Get Relief.

How many people suffer from an aching back? How few know the cause? If it hurts to stoop or lift? If you suffer sudden, darting pains? If you are weak, lame and tired. Suspect your kidneys. Watch for nature's signal. The first sign may be headache or dizziness.

Spontaneous, painful, or the frequent urination. Nervousness or a constant, dead-tired feeling.

Avert the serious kidney diseases. Treat the weakened kidneys with Doan's Kidney Pills.

A remedy especially for sick kidneys. Endorsed in Colorado Springs by your friends and neighbors.

Mrs. L. Peterson, 316 S. Hancock St., Colorado Springs, Colo., says: "For the past six years I have recommended Doan's Kidney Pills, as they cured me of backache and kidney weakness. I have heard many other people praise Doan's Kidney Pills just as highly as I do. Others in my family have found Doan's Kidney Pills very good."

For sale by all dealers. Price, 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other. Adv.

**ASK BOOSTERS TO JOIN CHAMBER OF COMMERCE**

City Council Suggests That Organization Week With Older Body; Request Perished.

The request of the Colorado Springs Boosters association for an appropriation by the city council of \$5,000 has been refused by Mayor McKeon and Commissioner of Finance Eubank, to whom the matter was referred by the city council for decision. The opinion of the city officials is that the best results can be obtained for the city by the Boosters association, becoming a part of the Chamber of Commerce and in that way working in unison. The following letter to the association was approved by the city council: November 7, 1913.

O. A. Bladen, Esq., Secretary C. S. Boosters Com. Assn., Colorado Springs, Colo.

Dear Sir: Your communication to the mayor and commissioners of Colorado Springs asking for an appropriation of \$5,000 to you has been received and carefully considered. Both the mayor and the council are in hearty sympathy with your association, as they are with every other organization which has for its purpose the upbuilding of the manufacturing and commercial interests of Colorado Springs.

You are aware that some years ago there were a number of civic organizations organized for the purpose of building up the various commercial interests of the city. It was found that these organizations working along independent lines could not accomplish as much as they could by working together in a single association, and as a result all these commercial bodies were united in a single body, the present Chamber of Commerce, and since the union of these organizations in the Chamber of Commerce that body has been able to do much better and more efficient work than ever before.

It appears to us that experience has shown that it is not a wise thing to organize and foster independent commercial organizations in the city of Colorado Springs, but that much better results can be obtained when all persons interested in the upbuilding of the city unite in one central body, having the different classes of industry represented by branches of the main organization.

**Suggests Cooperation.**

Do you not think it would be wise to the upbuilding of Colorado Springs to have the Chamber of Commerce and your association should become a branch of that organization, then it would for you to try to maintain a separate organization?

Every one of the 800 members of the Chamber of Commerce is interested in the upbuilding of the city, and if your organization was a branch of the Chamber of Commerce you could have the benefit of the influence and support of all the business interests of the city of Colorado Springs.

**HAVE DARK HAIR AND LOOK YOUNG**

Grandmother kept her hair beautifully darkened, glossy and abundant with a brew of Sage Tea and Sulphur. Whenever her hair fell out or took on that dull, faded or streaked appearance, this simple mixture was applied with wonderful effect. By peking at any drug store for "Wyeth's Sage and Sulphur Hair Restorer," you will get a large bottle of this old-time recipe, ready to use, for about 50 cents. This simple mixture can be depended upon to restore natural color and beauty to the hair and is splendid for dandruff, dry, itchy scalp and falling hair.

A well-known downtown druggist says everybody uses Wyeth's Sage and Sulphur, because it darkens so naturally and evenly that nobody can tell it has been applied. It's so easy to use, too. You simply dampen a sponge or soft brush and draw it through your hair, taking one strand at a time. By morning the gray hair disappears; after another application or two, it is restored to its natural color and looks glossy, soft and abundant. Adv.

**Thousands of Women**

Have Been Restored to Health By Lydia F. Pinkham's Vegetable Compound.

There is no doubt about this fact. Why during the last 30 years we have published in the newspapers of the country volumes of letters from women who have been relieved of all their suffering by the timely aid of this grand old medicine. Letters like the following, true, genuine and honest expressions of gratitude coming from grateful hearts surely you can believe these women.

"Mrs. L. S. BRENNER, Hudson, Mich., says:— 'For six years I was taken with a terrible pain in my right side, and sharp pains just like a knife sticking in. I tried hot applications but they did no good. I went to our family doctor (we were living in Bayville, Ohio at the time) and he said it was ovarian trouble. I doctored with him a while but kept getting worse. The pain was so terrible I could hardly stand on my feet. I could have that sharp pain in my right side, and I had heavy pain the whole length of my H-b. I called that something bad and I was just quietly, so I looked up all of your advertisements I could find and I saw that you described my case. I got a bottle of Lydia F. Pinkham's Vegetable Compound and it helped me from the first dose; and when I had taken two bottles my trouble was gone. Your medicine has done so much for me that I am willing you should publish this letter for the benefit of other suffering women.'—Mrs. L. S. BRENNER, Hudson, Mich."

"Mrs. L. E. BOWERS, Glend, Pa., says:— 'I have pleasure in informing you of what Lydia F. Pinkham's Vegetable Compound has done for me. For a year and a half last February, and for the rest of the year, I was not regular and had many bad feelings. I had all the time a bad dull headache, not much appetite, and also what I called a bad organic indigestion. Your Vegetable Compound entirely cured me and I feel that too much cannot be said in its praise as I am now able to do my own work. You are perfectly welcome to use my name for the benefit of other women.'—Mrs. L. E. BOWERS, Glend, Pa."

"Mrs. L. J. HARRIS, Genoa, N.Y., says:— 'I feel that I am able to do so much about your wonderful medicine. About a year ago I was taken with a terrible pain in my right side, and sharp pains just like a knife sticking in. I tried hot applications but they did no good. I went to our family doctor (we were living in Bayville, Ohio at the time) and he said it was ovarian trouble. I doctored with him a while but kept getting worse. The pain was so terrible I could hardly stand on my feet. I could have that sharp pain in my right side, and I had heavy pain the whole length of my H-b. I called that something bad and I was just quietly, so I looked up all of your advertisements I could find and I saw that you described my case. I got a bottle of Lydia F. Pinkham's Vegetable Compound and it helped me from the first dose; and when I had taken two bottles my trouble was gone. Your medicine has done so much for me that I am willing you should publish this letter for the benefit of other suffering women.'—Mrs. L. J. HARRIS, Genoa, N.Y."

Two volumes that will be of great interest to residents of the Pike's Peak region are to be published soon by Irving Howbert, a prominent pioneer. One will be a history of pioneer days in the region and the other will be a volume of reminiscences of a personal acquaintance. Mr. Howbert, accompanied by Mrs. Howbert, is now in the west and is superintending the work of publishing the books.

Probably no one is so capable of giving a true picture of pioneer scenes as the Rocky mountaineers as Irving Howbert. As a boy of 14 he crossed the plains in 1859, driving a bull team. He was identified with the construction of the Short Line and Midland railroads, the early boom days of Cripple Creek, and was brought in contact with the Indians and the detailed story of the days when men were fighting for their lives and for the foundation of Colorado Springs. The pioneer history will deal with the origin of the Indian and early Spanish invasion, and bits of history

**RIGHT-INDIA CRUISE**

Through the Red Sea to Bombay and Ceylon. The ship is a fine one, and the crew is excellent. The price is \$750 and up. For more information, contact S. S. CLEVELAND, 180 West Randolph St., Chicago, Ill.

## GER-AGGIF GAME DEFINITELY DECLARED

### OFF; NEW SPIRIT WHEN TEAM PLAYS DENVER

College Eleven, Fighting Mad, Will Show D. U.  
It Has Pulled Down the 'D & O.' Sign

There will be no Tiger-Aggie game this year. This was definitely decided yesterday between Coaches Rothbach and Hughes. Every effort was made to get the game on a week date but last proposition was blocked by C. O. faculty, who put a quietus on the scheme.

The real cause of the little difficulty was the Agricultural college was a understanding over the dates of spring when provisional agreements were made for the game this year. According to the contract the date for the game should be settled by both schools but making their schedule the Aggies decided on November 22, without consulting the Tiger authorities. Owing to the fact that they had three hard ones in a row, viz: University of Colorado, Mines and Denver, all away in home, the Tiger management did feel like scheduling the fourth. Then the churks from the Farmer headquarters that the Tigers were actually afraid to meet the Aggies at Collins. Following the injury of Clark on Washburn field last year, a foolish charge was withdrawn soon as it was made.

#### Schools Should "Make Up"

Whether relations between the two institutions, following the charges of playing unfairly by the Aggie team, will be settled next year and a new game in 1914, is not known. It is believed, however, that the schools will patch up their difficulties and not break relations and cause no trouble as Denver and Boulder three years ago. The sooner the schools can get together the better will be for the conference.

The Tigers don't win from the Denver team Saturday. It will be the lack of a fighting spirit in team. In spite of the fact that student body at Colorado college shown anything but the proper spirit towards its team since the defeat at Denver last Saturday, the team returned to work fighting mad.

#### Stratagem Anew "Canoe"

The stratagems of the last two weeks have been fiercely fought. The team has, nearly felt the criticism upon it and is doing everything in its power to "come back." All night the first and second years struggled against each other in the dark. The first team men put an offensive game that was fast and went over the second eleven time and again for long gains. The game opened up and forward passes came through the air and many needed. The backfield, Emmell, Clayburgh and Taylor, seemed to find new and tore through the scrubs almost every attempt.

Probably the feature of the evening's game was the work of Stock, of the Aggies, who played at end last night. He smashed in and broke up formations in a way that marked him one of the coming younger players. He may be given a chance during the next game.

Whether there will be any change

in the first eleven lineup, is not known. Balch has been working part of the time this week at quarter while Ross has been running the team the remainder.

#### "Well-laid" Student Body

Getting back to the subject of college loyalty it might well be said that the last week offered an example of just the reverse. Although some 150 supporters of the Tigers were at Union park in Denver Saturday afternoon, the rooting was nil, until "Muggsy" Herron gave vent to some of his pent-up feelings during the intermission and tried to start the crowd to yelling for the team that looked like the defeated ones at that moment. Then came the final period when the Tigers began to threaten to win and then the Tiger stands began to show signs of life. Which shows that the Colorado college students are good winners but mighty poor losers. When the team is winning nothing is too good for them. When they lose there isn't a cheer. Even the regular cheer leader was missing.

Monday at the chapel exercises at the college where all the students gathered together and where they have the opportunity to show the team that the students are backing them, there was an impressive silence broken by a hymn. "Would you blame a team for not having the fight when they know the students are not behind them?" It is certain that a team needs support when it is losing more than when it is winning.

If somebody could spill cayenne pepper in a student body meeting it might help the team.

#### Few Injuries This Year

The Colorado season has gone so far with little or no serious injuries, but Tuesday at Fort Collins Godbe, the Utah half sustained a broken arm. The agitation that usually follows the spring of the football season, on account of the game being too rough, had died down by this time, and the Utah player's injury will not receive columns of space it would have had it occurred at the start of the season. It is fortunate for the game, though, that the teams have gone through most of their recent games without having anyone seriously injured.

## New York Gets Law to Put End to Scalping

NEW YORK, Nov. 12.—A city ordinance designed to prevent ticket scalping at future world series baseball games here will be introduced in the board of aldermen at the instance of the district attorney's office as a result of the investigation by the county authorities of the success of speculators in obtaining tickets to the Giants-Athletic games at the Polo grounds last month.

A report submitted to District Attorney Whitman by his assistant assigned to make the inquiry shows that, while

## NORTHERN RULINGS TO

### BE OBSERVED IN PREP GAME HERE SATURDAY

Boulder Team Fast and Uses Forward Pass Without Restriction

The Terror-Prep game here Saturday for the intercollegiate championship of Colorado will be played under a new set of rules that will make the game considerably different than those played under the 1912 rulings. The Preps are champions of the northern section and when the season was opened the coaches and faculties of the high schools adopted a new set of rules that they believed would make the game less dangerous and would develop open playing. When the Terrors scheduled this game for the state title, the northerners insisted on their own rules.

The rules provide that a forward pass is legal any time and at any place in the field. A player can be put in and taken out any time the coach sees fit. The man catching the punt must be allowed to run two yards and if he doesn't do this at once the ball is given to the other side. Interference with the man catching the ball costs a penalty of 15 yards. The games are 30 minutes of actual play and a rest of 10 minutes between halves.

The rules will not hinder the Terrors—they should help them. With the forward pass unrestricted, the Terrors should prove a great offensive team, because they use the forward pass to great advantage all the time.

The northerners have a fast and heavy team but they are not believed to be as fast as the Terrors. The local eleven, under the keen eye of Dr. Acker, has been developed into a wonderful little machine that has yet to meet its match in intercollegiate or preparatory circles.

The Brown and White eleven with a strong second team was but for hard work last night and is getting into splendid condition. The open plays are being developed to a more complete stage and when the Boulder eleven has a few of the passes worked on them they will have a different opinion of the local.

The game will probably prove the most spectacular of the season and preparations are being made to handle a large crowd at Washburn field.

very few box seats reached the hands of speculators, nearly 1,200 seats were disposed of through hotel ticket agencies or by individuals. It was announced that, as a result of the manner in which these tickets were disposed, several thousands are to be arrested. One E. B. grounds ticket seller is already under arrest, and another is accused in the report. Twenty-five speculators were caught at work during the series.

Rivington Island, the Bronx had recently drafted by the county authorities of the success of speculators in obtaining tickets to the Giants-Athletic games at the Polo grounds last month.

According to German railway receipts a business reaction has set in in that country.

## The Great and Mighty Hans to Quit Baseball

JOHN HENRY (HANS) WAGNER

In support of the rumor that he has quite baseball for good, Hans Wagner, the famous shortstop, gives as his reason for leaving the diamond, the pressure of business. It is known that Hans has saved a considerable sum from his earnings in the many years he has been in the game, and that a large part of these earnings have been invested in Pittsburgh and Carnegie properties. It is also said that Wagner holds many shares of stock in steel companies.

## PROPOSED PRESIDENT OF A. A. U. HAS LONG RECORD

G. F. Pawling of Philadelphia Who Will Head Amateur Body Has Been a Great Athlete.

PHILADELPHIA, Nov. 12.—Twenty years ago George F. Pawling, of this city, started a career in athletics as a performer in local meets; today, at the age of 40, he stands the best chance of being the next president of the Amateur Athletic Union of the United States or the A. A. U., as it is more familiarly known.

The election will take place at the Waldorf-Astoria next Monday, and there is little or no opposition to the plan to elect the Philadelphia man to the office.

The only serious contest has moved the way for the election of Mr. Pawling, who belongs to the younger set of the players that control the destinies of the American amateur athlete.

In past years the office, almost without interruption, has been filled by a veteran, generally a member of the organization. As the A. A. U. developed more exclusively with the youth and very young men, it was thought good policy to change to a younger man, one more in sympathy with the participants in track, field and road sports.

But the A. A. U. is a big organization and requires a big man to fill the office of president. He must not only be broad and fair but at the same time have his head and conservative.

RAIN POSTPONES WHITE SOX-GIANT GAME AT SACRAMENTO

SACRAMENTO, Cal., Nov. 12.—Chicago American National game postponed, rain.

## CRAWFORD WILL MAKE A RECORD FOR LOVE OF GAME

Detroit's Great Outfielder Engages in More Than 225 Games Every Year.

When the bells ring out the old year Sam Crawford will have achieved a new world's record. It is believed, for the number of games in which a major leaguer has played in a twelve-month.

Crawford was in New Orleans all last winter. There he played once or twice a week with some of the winter league teams they have down in that Southern town, with Jimmy Dugger, former Athletic pitcher, and others. He put in eight or ten games there.

"Wahoo Sam" forgot his holdout aspirations early enough to get in on all of the Times' exhibition games on the way North. They amounted to 25 or so. He got in on every game of the American league schedule and now he is playing every day with the world's tourists.

It is roughly estimated that Sam's total games for the year, January 1 to January 1, will be between 225 and 250. This is a tribute to Crawford, who keeps in such excellent shape that he never has to take a day off.

He is so careful of himself that he is seldom injured, and then he is in such good shape that it does not take him long to get back into the game. Sam said last spring that he could remember only two or three times during his entire career when he was out of the game for more than a day or so at a time because of sickness or injury.

## Accused of Reing Professional, Finn Proves an Amateur

NEW YORK, Nov. 12.—Hannes Kolehmainen, Olympic runner, who came here from Finland and joined the Irish-American Athletic club, appeared before the registration committee of the Metropolitan district of the Amateur Athletic union tonight to be questioned regarding reports that he is a professional, and not an amateur. Having been directed to produce all the prizes he has won since coming to America, Kolehmainen surprised the committee by producing three more trophies than the investigators had recalled. The Finnish runner drove up in an automobile filled with cups and medals, and proved to the committee's satisfaction, it was said, that he had not pawned any prizes awarded him. The committee reserved decision.

Sporting men familiar with the inquiry characterized it as having fallen through for lack of evidence. All of Kolehmainen's prizes were returned to him, and it was pointed out by his friends that had he been found guilty of professionalism, they would have been withheld by the committee. It was learned that no direct charges were filed against the runner, and, in some quarters, the inquiry was regarded as the outcome merely of state-ments by athletes envious of his success.

Fears that Charles Webb Murphy, owner of the Chicago Cubs, who called for Europe will make Ireland his permanent home, are unfounded. Murphy will stay abroad only five weeks, and will return in time to shop things up at the annual meeting of the National league in this city on December 5.

## MINORS PROTEST HOG TACTICS OF MAJORS; NEW CONTRACT FORM

Reforms Promised in Drafting; Fraternity Demands Will Be Listened To

COLUMBUS, O., Nov. 12.—Five committees were announced by President Sexton of the National Association of Professional Baseball Leagues at today's session. One committee was assigned the problem of devising a way whereby a uniform style of contract can be prepared for players of the five different classes of leagues affiliating with the organization and is headed by President Leavitt of the Oakland club of the Pacific Coast league.

In a communication to the convention, the national commission made the suggestion of uniformity. The greatest obstacle now apparent, baseball men say, is the possible insertion of a clause requiring a player to be given notice of release 10 days prior to the time the release can be made effective. It is understood that Class A leagues are willing to work under this plan, but those in Classes B, C and D do not favor the idea of having to carry and pay a useless player for 10 days.

#### Reform Drafting Scheme

President Tanager of the Three-I league urged a movement for a reform in the system of drafting players. He attacked the practice of major league clubs in claiming a large number of players, and then making cancellations of the drafts, and was given hearty support. It was voted that such procedure be abandoned by national association clubs.

In the discussion, President Dreyfuss of the Pittsburgh National league club, charged that violations of rules by the national commissioners themselves were responsible for the trouble that had occurred.

Secretary Farrell read to the convention today the list of requests from the players' fraternity. No action was taken, it being left to the committee on contracts to formulate a course of procedure to be submitted to the convention for ratification. No objection will be made to sending committees into conference with the national commission and representative players.

## Haggin Will Reenter Turf; Buys \$50,000 Worth Thoroughbreds

LEXINGTON, Ky., Nov. 12.—While purchasing the noted, thoroughbred horse Ballot at the horse sales here today, James R. Haggin, financier of New York and Lexington, announced that he would reenter the thoroughbred turf and would operate on an extended scale. Haggin paid \$50,000 for Ballot to John L. Middleton and shortly afterward purchased the imported English sire Sain, from Barney Schreiber of Missouri for \$5,000. Both of the horses will be placed at Elmendorf, Haggin's country home here, where three years ago the millionaire turfman disposed of a large majority of his good stallions, mares and colts.

Student insurance is a feature of German continuation schools. For an insurance fee of 10 cents per half year, the students in the schools for builders, for example, are insured against all accidents that may happen to them in the school room or on the way to and from school.

# NEW YORK

The fastest time between Colorado Springs and New York and the east on the magnificent ROCKY MOUNTAIN LIMITED, in connection with swift De Luxe limited trains east of Chicago, and providing every comfort and luxury.

An advantage of this high-class service enables travelers to avoid the necessity of changing stations in Chicago or Englewood unless desired.

Leave Colorado Springs at 11:20 A. M. daily, arriving Chicago at 4:30 P. M. NEXT DAY and New York SECOND EVENING.

## Invalid Men and Women

I will give you FREE a sample of Dr. Pierce's Pleasant Pellets that have brought health and happiness to thousands—also a book on any chronic disease requested.

During many years of practice I have used numerous combinations of curative medicines for liver ills. I have kept a record of the result in case after case, so that my staff of physicians and surgeons, at the Invalids' Hotel, Buffalo, N. Y., are able to diagnose and treat cases at a distance with uniform good results.

But for the permanent relief of blood disorders and impurities, I can recommend my "Golden Medical Discovery," a blood medicine without alcohol or other injurious ingredients. R. V. PIERCE, M.D., Buffalo, N. Y.

## Nature's Way Is The Best

Buried deep in our American forest, queen's root, mandrake and other rare, golden seal, Oregon grape root and chrysomelids. Of these Dr. R. V. Pierce made a pure, strong extract which has been favorably known for over forty years. He called it "GOLDEN MEDICAL DISCOVERY." This "Discovery" purifies the blood and tones up the stomach and the entire system in Nature's own way. It's just the tissue builder and tonic you require.

expected to cure consumption in its advanced stages—no medicine will do that—bucc for all the obstinate, chronic coughs, which, if neglected, or badly treated, lead up to consumption, it is the best medicine that can be taken.

Sold in tablet or liquid form by all principal dealers in medicines, or send list, one-cent stamps for trial packages of tablets.

To find out more about the above mentioned diseases and all about the body in health and disease, get the Common Sense Medical Adviser—The People's Schoolmaster in Medicine—revised and up-to-date book of 1,008 pages. Cloth-bound, sent post-paid on receipt of 31 cents in one-cent stamps to pay cost of wrapping and mailing only. Address: Dr. Pierce's Invalids' Hotel, Buffalo, N. Y.

## CRIPPLE CREEK MINES

HOBSON WILL TAKE UP  
LEASE DEERHORN MINE

CRIPPLE CREEK, Nov. 12.—William Hobson, of this city, who a short while ago secured a prospecting permit, accompanied by lease option, on the Deerhorn mine, on the summit of Globe hill from Stratton's Cripple Creek Mining and Development company, the corporate name of the Stratton estate, has already opened up one of commercial value, and will take up the option. A lease will accordingly issue during one year from April, 1914.

Hobson, who for the past ten years has operated on different blocks of the Stratton estate on Globe hill, and is well posted as to local conditions, has exposed and is now developing a new ore shoot, at the second level of the Deerhorn shaft, on one of the quartz veins traversing the breccia, and is saving over a good average milling grade. The mine samples showing values of one ounce gold to the ton and better. The new discovery was made at a point at no great distance from the shaft, and although the mine has been continuously operated for the past 10 years under lease, this shoot was evidently overlooked or unknown. A shipment is now being prepared and the mine will be back on the shipping list by the end of the week.

In addition to the lease on the Deerhorn mine, Hobson is also operating leasing blocks 54 and 55 of the Stratton estate, located on the Lady Smith lode mining claim, and a shipment from the workings on block 54, sent to the Portland Gold Mining company's mill at Colorado City for treatment, brought settlement yesterday at the rate of \$21.90 to the ton. Another shipment from the same block will shortly be loaded out.

Hobson plans to further exploit the miles of laterals found in the Deerhorn mine workings, confident in his knowledge of Globe hill conditions that the ore bodies to be found in the huge mass of volcanic breccia from this immediate section are far from exhausted or worked out.

Another active property of the Stratton estate on Globe hill, is the Globe lode mining claim. Block 56, on the western end of the claim has been leased to M. A. Abernathy of this city. The portal of the Globe Hill tunnel in situ on this leasing block, and while Abernathy and his partners are at this time prospecting at surface by open trench and shallow shaft, should an ore body be exposed, the operators may determine to work through the tunnel traversing the claim, gaining depth on the vein.

The Jerry Johnson mine on Iron-clad hill, owned by the Jerry Johnson Mining company, and active under lease to Calley and Fogelman, is loading out three cars of ore this week, and the values obtained in the shipments of acanthite and coarse quartz will average \$30 to the ton.

Oscar Fogelman, who is in charge of operations, is mining ore in three levels, the 300-foot level, the 450-foot level and the 600-foot level. Strong ore bodies are reported under development and the November tonnage will show material increase over that of the preceding months last past.

Lessee Smith and Stafford, operating the Damon block of the Jerry Johnson Mining company, are loading out three cars of ore this week, and the values obtained in the shipments of acanthite and coarse quartz will average \$30 to the ton.

In addition to the Jerry Johnson properties, the Damon mine of the United Gold Mines company, the Forest Queen mine and the Iron-clad Cripple Creek and mines on Iron-clad hill are also producing.

The Little one of the Bull hill group of mines owned by the Stratton estate, and active under lease to George, McPherson and associates, is back on the shipping list. McPherson exhausted the ore body on which he was working last summer, and has prosecuted considerable work in the search for a new ore body. Yesterday a car of coarse rock and screenings was loaded out, and the ore, it is estimated, will return values on an average of \$30 to the ton.

The Sunshine Mining company, operating the Sunshine mine on Galena hill, made the second shipment since securing the lease, yesterday, when a car of milling grade ore was loaded out to be forwarded to one of the local sampling plants, prior to shipment to Colorado Springs.

The leasing company, whose shareholders are local men, are now sinking a winze preparatory to driving under the ore shoot, where it is confidently expected higher values will obtain.

NEW YORK, Nov. 12.—Improvement in speculative sentiment, both at home and abroad, was reflected today in a general rise in stocks. It was difficult to trace a direct connection between the change in sentiment and the day's news, which presented no essentially new aspects. There was a general impression that the outlook for peaceful solution of the Mexican problem was brighter. Mexican securities moved up sharply in London and there was a substantial rise here in National Railways of Mexico, second preferred.

An important influence was the conviction that a substantial rally was due, after the protracted period of weakness through which the market has passed.

The better feeling abroad was of direct influence on this market, on account of liberal buying for foreign account. Berlin took Canadian Pacific and Paris the coppers. London's purchases were widely distributed, being estimated at 30,000 shares.

Trading was most active in the first part of the day, and it became dull after the immediate requirements of the shorts had been met. The market thereafter maintained its firm tone. In spite of a few weak spots, Mexican Petroleum broke nearly five points on the report that the quarterly dividend had been passed. New Haven touched a new low record at 77, but rallied later.

Business in bonds was small, and price movements were uncertain. Quotations furnished by Otis & Co.

NEW YORK, Nov. 12.—Butter unchanged; receipts, 1,800 cases. Cheese lower; dairies, 14 1/2 to 15 1/2; longhorn, 14 1/2 to 15 1/2. Potatoes unchanged; receipts, 45 cars. Poultry, alive, higher; springs, 13c; fowls, 11c; turkeys, 16c.

Mary E. Miller, a 12-year-old girl, recently swam across the Hudson river, a distance of 1 1/2 miles, in 49 minutes.

CHICAGO, Nov. 12.—Heavy rains in drought-stricken parts of Argentina today lowered the price of wheat. The closing tone of the market, however, was firm at 1/2 to 3/4 net decline. Corn and oats both finished a shade off to 1/2c up. In provisions, the outcome varied from the last night's level to 12 1/2c advance.

Wheat speculators who had been the most active buyers yesterday put liberal offerings today on a sagging market. Cordova, Buenos Aires and the Pampas all sent word that the drought which imperiled the Argentine crop was broken. Liquidating sales, however, were checked by resting commission orders before any serious flurry developed.

Relating power showed itself best in wheat after Winnipeg sent word of a reduced estimate on the size of the Canadian crop and gave figures to indicate the huge amount already moved. It was said more than 70 per cent was off the farms in the northwest. There were also late cable dispatches asserting that the Argentine rains were sufficient.

Corn made a good recovery, owing chiefly to profit taking by shorts. The market suffered a break early as a result of fine weather and weak cables. Subsequent firmness was helped by signs that shipping call for old corn had considerably improved. A few big traders gathered in all the points that scattered longer let go of. The investors ignored liberal stocks in Chicago and elsewhere, as well as the chances of big imports from Canada.

Buying on the part of a leading packer, who was said to have been operating on the short side of the market, tended to cause an upturn in provisions. Serious prevalence of hog cholera throughout the best corn-producing states attracted increased attention. Quotations furnished by Otis & Co.

Mary E. Miller, a 12-year-old girl, recently swam across the Hudson river, a distance of 1 1/2 miles, in 49 minutes.

CHICAGO, Nov. 12.—Heavy rains in drought-stricken parts of Argentina today lowered the price of wheat. The closing tone of the market, however, was firm at 1/2 to 3/4 net decline. Corn and oats both finished a shade off to 1/2c up. In provisions, the outcome varied from the last night's level to 12 1/2c advance.

Wheat speculators who had been the most active buyers yesterday put liberal offerings today on a sagging market. Cordova, Buenos Aires and the Pampas all sent word that the drought which imperiled the Argentine crop was broken. Liquidating sales, however, were checked by resting commission orders before any serious flurry developed.

Relating power showed itself best in wheat after Winnipeg sent word of a reduced estimate on the size of the Canadian crop and gave figures to indicate the huge amount already moved. It was said more than 70 per cent was off the farms in the northwest. There were also late cable dispatches asserting that the Argentine rains were sufficient.

Corn made a good recovery, owing chiefly to profit taking by shorts. The market suffered a break early as a result of fine weather and weak cables. Subsequent firmness was helped by signs that shipping call for old corn had considerably improved. A few big traders gathered in all the points that scattered longer let go of. The investors ignored liberal stocks in Chicago and elsewhere, as well as the chances of big imports from Canada.

Buying on the part of a leading packer, who was said to have been operating on the short side of the market, tended to cause an upturn in provisions. Serious prevalence of hog cholera throughout the best corn-producing states attracted increased attention. Quotations furnished by Otis & Co.
